

APU Packaging

Aerosol Actuators — Product Range

APU aerosol actuators are the press buttons that sit on top of the valve and shape how product leaves the can — the spray pattern, particle size and direction. Each actuator fits the valve stem (or, for metering types, the metering-valve stem) and can be supplied with APU's standard insert or an orifice sized to the formula. The range spans small and large button styles for sprays, deodorants, air fresheners and technical products, in a wide choice of colours.

D01 Large button actuator · general purpose

Overview

D01 is a large-diameter button actuator for everyday continuous-spray products. Its broad press pad is comfortable to use across a wide range of applications, and it takes APU's standard insert so the spray can be matched to the formula. A dependable general-purpose choice for personal and home-care aerosols.

Why D01

Large, comfortable press pad — the wide button suits frequent use and a broad range of everyday spray products.

Orifice insert options — supplied with APU's standard insert or an alternative orifice size to tune spray rate, particle size and pattern to the formula.

Fits the valve stem — mounts onto the standard aerosol valve stem for straightforward assembly on existing lines.

Colour choice — available in a range of stock and custom colours to match the pack.

Specifications

Type	Large button actuator
Fitment	Fits standard aerosol valve stem
Insert	APU standard insert (alternative orifice on request)
Colour options	Stock and custom

Ideal for

Personal care sprays · home-care sprays · general continuous-spray products

D06 Round actuator · deodorant

Overview

D06 is a round 'dome-head' button actuator normally used for deodorant sprays. It accepts different orifice inserts, so the discharge can be tuned to the product, and its rounded form gives a soft, comfortable press. Well suited to body sprays and deodorants where a smooth spray feel matters.

Why D06

Round, easy-press head — the domed shape is comfortable in the hand for body-spray and deodorant use.

Interchangeable orifice inserts — different insert sizes tune the spray rate and particle size to the deodorant formula.

Fits the valve stem — mounts onto the standard aerosol valve stem for straightforward assembly

on existing lines.

Colour choice — available in a range of stock and custom colours to match the pack.

Specifications

Type	Round (dome-head) actuator
Fitment	Fits standard aerosol valve stem
Insert	Interchangeable orifice inserts
Colour options	Stock and custom

Ideal for

Deodorant sprays · body sprays · antiperspirant aerosols

D04

Tube actuator · industrial / technical

Overview

D04 is a one-piece button actuator with an integrated extension tube and a 1.1 mm spray orifice, made for technical and industrial applications. The tube directs product into hard-to-reach areas, and the wider orifice suits cleaning and maintenance sprays. A classic design for industrial cleaners and technical aerosols.

Why D04

Integrated extension tube — the built-in tube directs the spray precisely into tight or hard-to-reach spots.

1.1 mm spray orifice — a wider orifice suits the higher flow of cleaning and technical products.

One-piece design — the tube is moulded in, so there is no loose straw to attach or misplace.

Fits the valve stem — mounts onto the standard aerosol valve stem for straightforward assembly on existing lines.

Specifications

Type	Tube (extended) actuator, one-piece
Fitment	Fits standard aerosol valve stem
Extension tube	Integrated
Spray orifice	1.1 mm
Colour options	Stock and custom

Ideal for

Industrial cleaners · technical & maintenance sprays · lubricants · contact cleaners

X13

L-type metering actuator · air freshener

Overview

X13 is an L-shaped metering actuator supplied with APU's standard insert, normally used on air-freshener cans. It fits the metering-valve stem to deliver a fixed dose per press, and the side-directed L form suits automatic and manual air-freshener dispensers.

Why X13

L-type metered spray — the L-shape works with a metering valve to release a fixed dose in a directed spray.

Fits the metering-valve stem — mounts on the metering-valve stem for air-freshener dosing.

Standard insert — supplied with APU’s regular insert for consistent air-freshener output.

Colour choice — available in a range of stock and custom colours to match the pack.

Specifications

Type	L-type metering actuator
Fitment	Fits metering-valve stem
Insert	APU standard insert
Typical use	Air freshener
Colour options	Stock and custom

Ideal for

Air-freshener sprays · automatic dispenser refills · metered room sprays

X14 L-type metering actuator · air freshener

Overview

X14 is an L-shaped metering actuator supplied with APU’s standard insert, normally used on air-freshener cans. Like X13 it fits the metering-valve stem for a fixed dose per press; the X14 head profile offers an alternative style for air-freshener dispensers.

Why X14

L-type metered spray — the L-shape works with a metering valve to release a fixed dose in a directed spray.

Fits the metering-valve stem — mounts on the metering-valve stem for air-freshener dosing.

Standard insert — supplied with APU’s regular insert for consistent air-freshener output.

Colour choice — available in a range of stock and custom colours to match the pack.

Specifications

Type	L-type metering actuator
Fitment	Fits metering-valve stem
Insert	APU standard insert
Typical use	Air freshener
Colour options	Stock and custom

Ideal for

Air-freshener sprays · automatic dispenser refills · metered room sprays

X01 Small button actuator · with insert

Overview

X01 is a small button actuator supplied with APU’s standard insert. Its compact form suits smaller cans and fine continuous-spray products, and the insert tunes the spray to the formula. A versatile small-format actuator for personal and home care.

Why X01

Compact button — the small profile suits smaller cans and fine everyday sprays.

Orifice insert options — supplied with APU’s standard insert or an alternative orifice size to tune spray rate, particle size and pattern to the formula.

Fits the valve stem — mounts onto the standard aerosol valve stem for straightforward assembly on existing lines.

Colour choice — available in a range of stock and custom colours to match the pack.

Specifications

Type	Small button actuator
Fitment	Fits standard aerosol valve stem
Insert	APU standard insert (alternative orifice on request)
Colour options	Stock and custom

Ideal for

Personal care sprays · home-care sprays · fine continuous-spray products
